

POSTWICK HUB ORDERS - PRESS STATEMENT FROM CPRE NORFOLK

James Frost, Director of CPRE Norfolk, said, "A Public Inquiry into the Postwick Hub Orders is vital. Local people deserve it, local councils deserve it and the local countryside deserves it. Without it, Norfolk County Council runs the risk of hijacking the proper planning process and causing a backlash.

"On face value, there is no need for such significant changes to the junction and the plans will simply cause congestion and emissions. Only when you see the Postwick scheme in relation to a proposed NDR do you see the purpose it is serving.

"But consultations on the NDR have not been concluded and no decision has been taken, making the Postwick Hub Orders woefully pre-emptive. You would think that the Highways Agency, out of everyone, would recognise a case of 'cart before the horse'", James concluded.
